Carrer Objective

Seeking a challenging yet rewarding carrer with a progressive organization that provides the opportunity for development, I'll try to contribute with my best effort wherever I get an opportunity. Finally, development is my passion.

Skills

- Fronted: React, JavaScript, Tailwind CSS
- Bankend: Express JS, MongoDB
- Tools: Git, Github, Croome Dev tools, VS Code,
- Deployment: Firebase, Surge, Vercel, Netlify

Ex: I'm captable of leading a team. And I feel comfortable in teamwork. I also can work hard and do my best.

Projects

Employee Management || [Live project](#) | [Client repository](#) | [Server repository](#) Duration: 8 days

This is a Employee management website. This website is perfect for manage all employee for a comapny. Here are three role like Admin,HR, employee. HR can manage any eployee as he want. Admin can fire or make HR any employer.

- I am using daisyUI for the entire project.
- Implement dashboard feature and use admin verify system in client site and also server-side through JWT token.

Technology Used: React,Tailwind, Express JS, MongoDB, Firebase, Vercel

Hotel Room Booking Management || [Live project](#) | [Client repository](#) | [Server repositor](#) Duration: 6 days

This is a hotel room booking website. Customer can book any room after login if the room is avilable for that day. He/She can also cancel the booking if he want .

- Using swiper js in this project.
- Implement jwt token for better security

Technology Used: React, Express JS, MongoDB, Firebase, Vercel

Brand Shop || [Live project](#) | [Client repository](#) | [Server repository](#) Duration: 4 days

This is the fashion-related website. here users can show specefic brand products and buy.

- Using some awesome react component library like react paralax,react awesome slider
- Implement jwt token for better security
- Implement theme mood. Users can toggle dark and light moods.

Technology Used: React, Express JS, MongoDB, Firebase, Vercel
